The KettenWulf Group worldwide

The headquarters of the KettenWulf Group in Kückelheim

For over 80 years, KettenWulf, as an expanding global company, has stood for quality, reliability and flexibility. More than 1200 employees develop, produce and market customized solutions in the field of conveying and drive technology at ten locations across Europe, America and Asia. All around the globe, KettenWulf is your strategic partner when it comes to delivering optimum product quality.

Trust, loyalty and commitment – these values are what KettenWulf stands for. As a medium-sized, family-run company, cultivating a strong, personalized partnership with both our customers and suppliers is our highest priority.

Be it the Sauerland, Hangzhou, Atlanta or Pune – as an international company with worldwide operations, our employees are always at your service to meet your unique business needs and to provide you with industry leading technical support.

KettenWulf conveyor chains

KettenWulf is a leading manufacturer of high-quality conveyor chains. Our products are used across many industries such as the automotive, bulk material handling and wood-processing industries.

As the requirements of our customers vary significantly, KettenWulf mainly provides customized solutions in the conveyor chain sector. Our engineers and technicians develop special conveyor and transport chains which are aligned and optimized to meet your specific needs and applications.

KettenWulf drive chains

From drive chains for the use in production machinery up to chains for agricultural equipment – KettenWulf offers the optimal product to meet your specific requirements.

No matter whether you intend to use a chain for intense long-term performance or high resistance against variations in temperature and corrosion – KettenWulf has got the answer. We provide a wide range of drive chains in all DIN measurements and according to all international standards for a wide variety of applications.

KettenWulf sprockets

KettenWulf sprockets are a critical factor for the capacity and endurance of every chain system. In order to ensure the quality of all products, KettenWulf relies on the production of its own sprockets.

In addition to sprockets with DIN/ISO/ANSI-gearing, our range of products also covers individual solutions with optimized tooth profiles and wheel sizes. Whether you need sprockets of high-quality material, with special tempering or induction-hardened teeth – KettenWulf has got the solution.

KettenWulf special chains and components

As a comprehensive supplier, we offer our customers the opportunity to purchase complete units within the product group of chains and sprockets. This has two essential advantages for our customers:

- » quality assurance of the entire unit
- » cost reduction through lower number of suppliers
